

# GOLDEN GATE PARKWAY COMPLETE STREET STUDY

## Project Description

Collier County Growth Management Department is conducting a Complete Street Study to evaluate improvements to Golden Gate Parkway between Santa Barbara Boulevard and Collier Boulevard. Improvements are intended to make it more safe and convenient to walk, bicycle, or drive along Golden Gate Parkway by offering multimodal transportation options and upgrades, such as lighting and landscaping.

## Schedule

**November through February 2021**

Provide your input and preferences

**March through June 2021**

Study to be finalized and presented to Board of County Commissioners

### Concept 1:

#### Overlay Multimodal

A path for cyclists and walkers to share on both sides of the street separated from vehicles by a landscape area for enhanced safety.

### Concept 2:

#### Separated Multimodal

Drivers, cyclists, and walkers will all be separated from one another. There will be sidewalks (narrower than the shared path in Concept 1) and bike lanes on both sides of the road, with a landscape area between the walkers and bikers and between the bikers and vehicles, for enhanced safety. Bike lanes may be interrupted to accommodate right turn lanes, bus pull offs, or bus shelters.

### Concept 3:

#### Incremental Multimodal

At first, there will be a wide shared path on both sides of the street. The path will later become a wide bike lane on both sides of the street with a sidewalk (narrower than the shared path in Concept 1) on the outside edges of both sides of the street. Drivers, cyclists, and walkers will all be separated from one another. Bike lanes may be interrupted to accommodate right turn lanes, bus pull offs, or bus shelters.

○ Represents conditions that vary from County and State standards.

### All Concepts Include:

- Tree lined street with street and pedestrian lighting
- Four 11' vehicle travel lanes
- 24' wide median
